

Here is an illustration of how to split the new style  
Obtain some empty sterile vials and 1 cc tubuclin syringes.

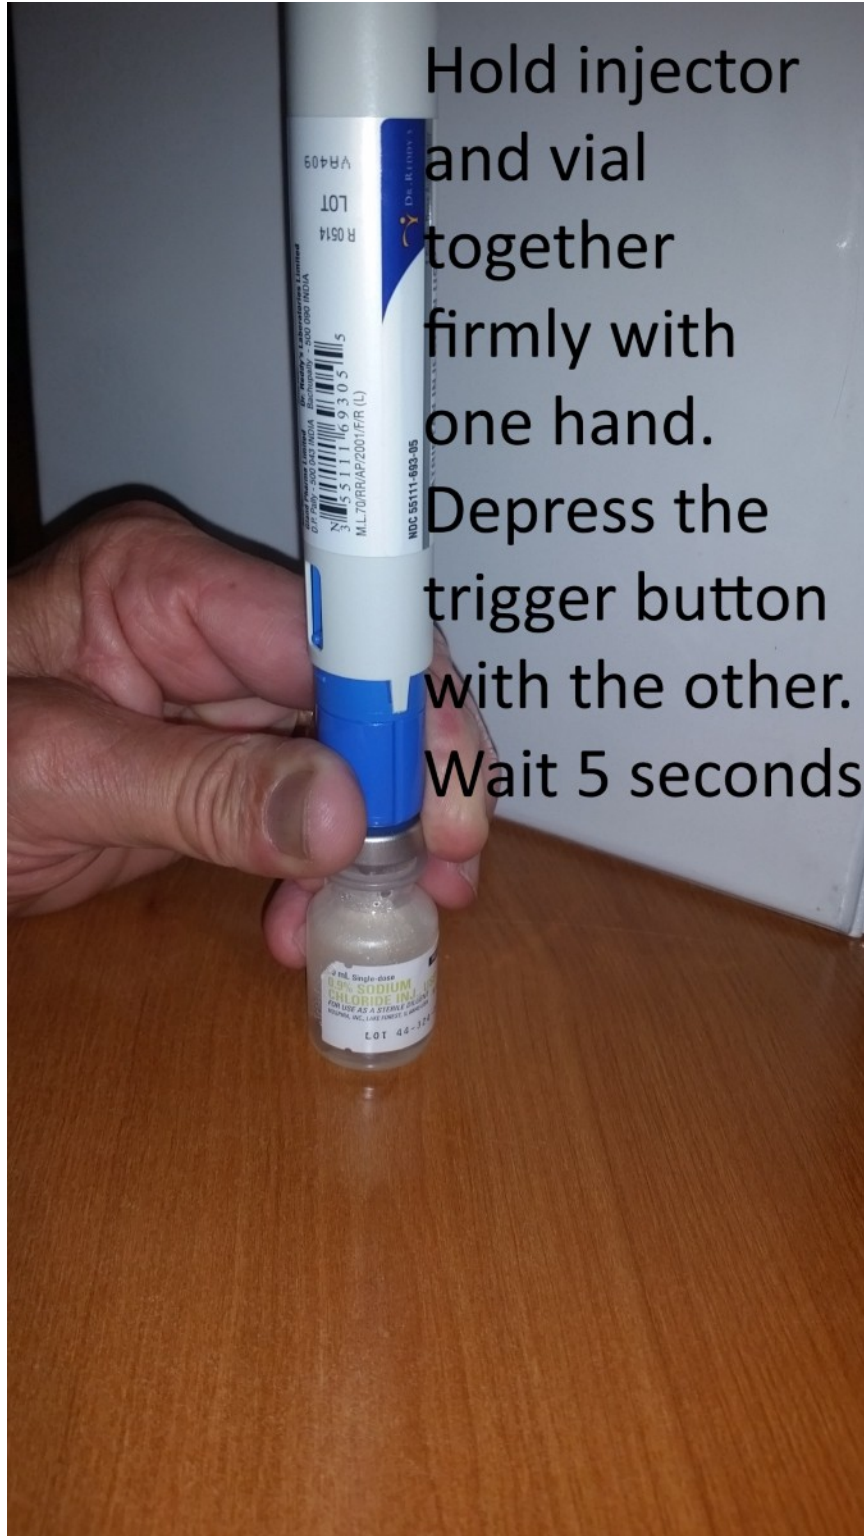

<https://www.google.com/search?q=10ml+Sealed+Sterile+AMBER+Vials&ie=utf-8&oe=utf-8>

<https://www.google.com/search?q=1cc+syringes&ie=utf-8&oe=utf-8>

Center over  
needle port  
on vial

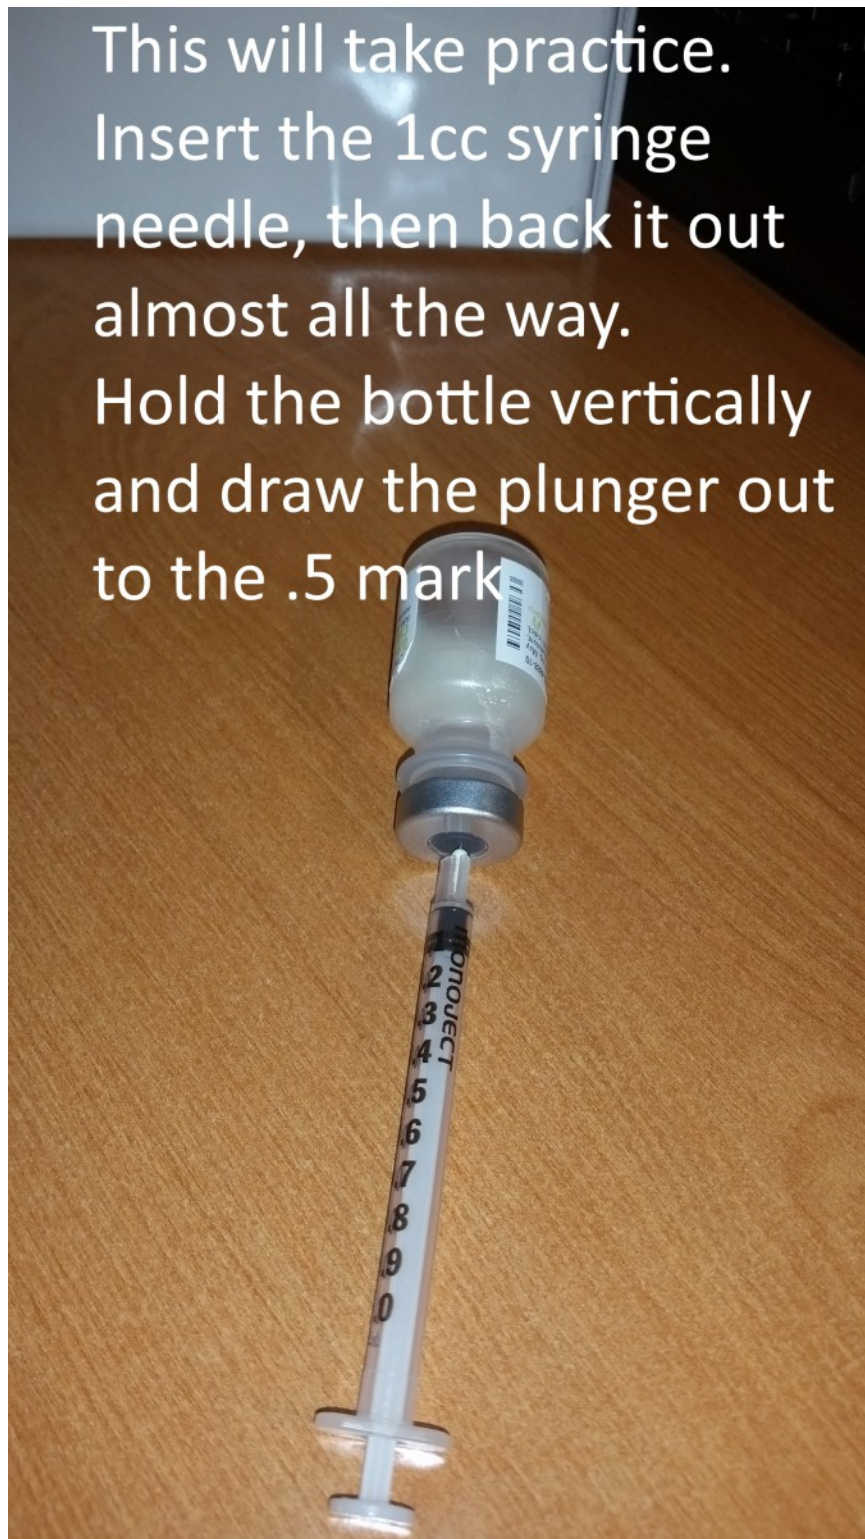

Hold injector  
and vial  
together  
firmly with  
one hand.  
Depress the  
trigger button  
with the other.  
Wait 5 seconds

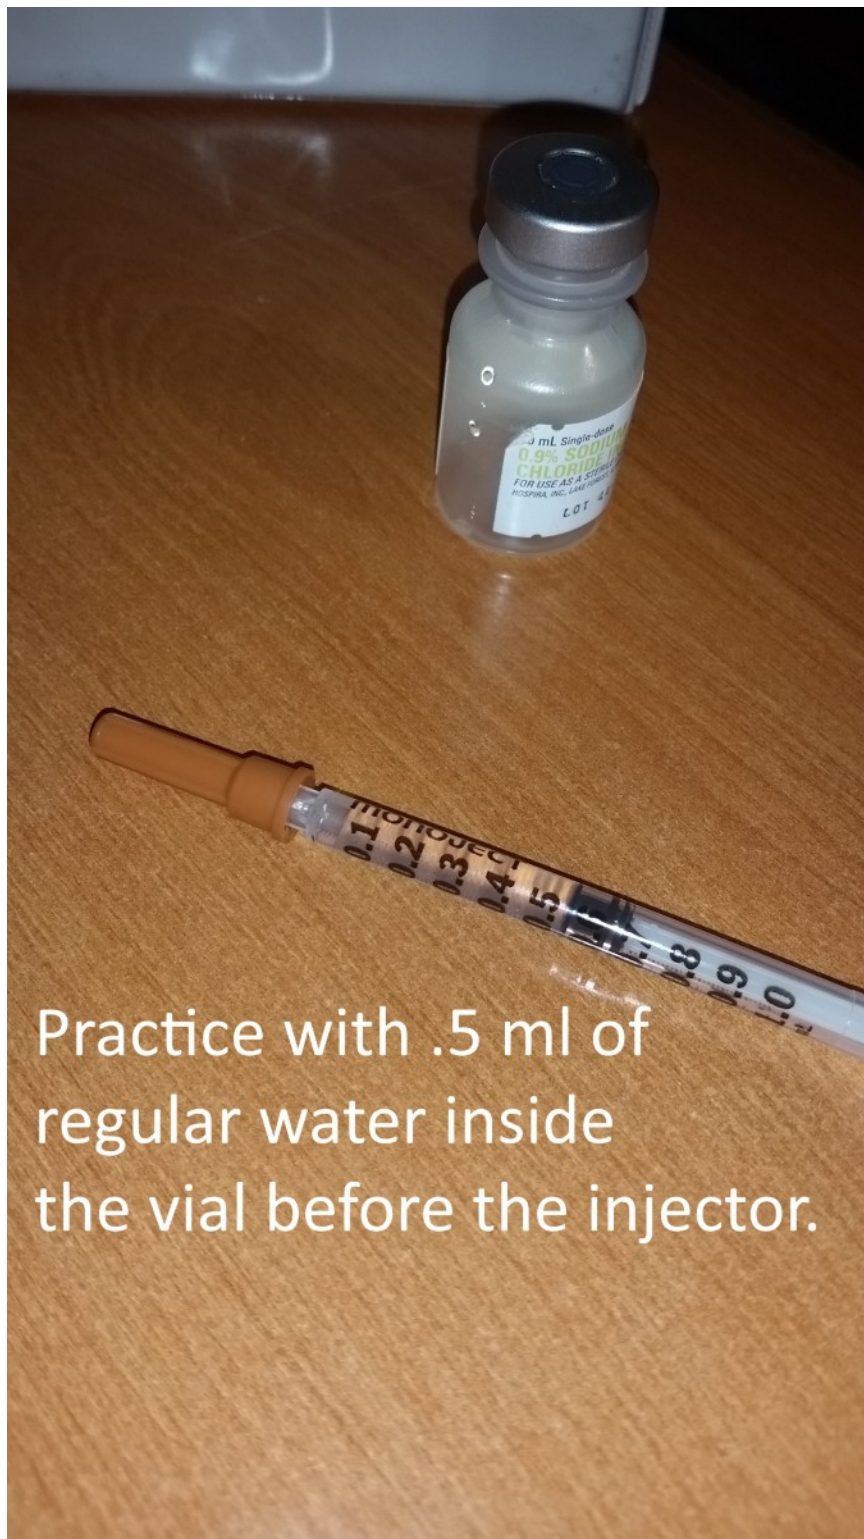

.5 ml solution in bottom

This will take practice.  
Insert the 1cc syringe  
needle, then back it out  
almost all the way.  
Hold the bottle vertically  
and draw the plunger out  
to the .5 mark

Practice with .5 ml of regular water inside the vial before the injector.
